 - Process
 - Insights
 - Summary
- 
- Three large, stylized purple circles are positioned on the right side of the slide. Each circle is partially cut off by the edge of the frame, creating a sense of continuity or a larger design.

Project Recap

Social Buzz, a rapidly growing tech company, needs to scale efficiently on a global level. Accenture has launched a three-month Proof of Concept (POC) to address key challenges.

Key Focus Areas:

- Audit of Social Buzz's big data practice.
- Recommendation of successful IPO.
- Analysis.

Problem

Over 1,00,000 pieces of content
EVERYDAY!!

How to maximize the benefits of this abundance??

Analysis of the data to find Social Buzz's top 5 most popular
Categories of Content

Insights

Trend of Top 5 Categories by Score

Reactions by Category and no. of Reaction of Top Category "Animal" is 1897

Monthly Analysis of no. of Posts

Implications

- High-performing content categories can be promoted to boost user retention and ad revenue.
- Personalized content strategies based on engagement data can increase app stickiness.
- Time and location-based posting strategies can improve global reach.
- Data-backed decisions improve investor confidence in IPO prospects.

Recommendations

- **Prioritize high-engagement categories** for feature promotion on the app.
- **Launch creator campaigns** in trending content areas to boost uploads.
- **Implement advanced recommendation algorithms** based on category and engagement.
- **Use peak engagement times** to schedule content releases.
- **Continue data monitoring** to adapt strategy in real time post-IPO.

Summary

Analyzed Social Buzz data using **Power BI** to identify **top content categories, engagement trends, and user reactions**. Key insights show **Animals & Science** as highly engaging, with **Photos & Videos** being the most popular formats. These findings help optimize content strategy, boost user retention, and enhance monetization for IPO readiness.
